EDUCATION

Vivekanand Education Society's Institute of Technology, Mumbai

2019 – 2023

Bachelor of Engineering in Information Technology Engineering

CGPA: 8.94

Technical Courses: Data Structures and Algorithms, Operating Systems, Database Management Systems, Object Oriented Programming, Computer Networks,

SKILLS

- **Programming Languages:** Python, SQL, JavaScript, Java, C++.
- **Web Technologies & Frameworks:** React.js, Django, Spring Boot, Redux.
- **Tools & Technologies:** Gitlab, CI\CD, Docker, Redis, AWS EC2, Linux, SSIS, SSRS.
- **Libraries:** pandas, numpy, reportlab.

WORK EXPERIENCE

ISS-Stoxx | Software Developer (Analyst) Python, SQL, React JS, Java

July 2023-Present

- Developed and implemented a **UI driven PDF report generation framework** using **Python** and **SQL**, automating real-time reporting reducing 80% efforts of the business to generate the real-time data and also have configurable formatting options provided on UI using **React- redux** and **REST API's** using **Spring Boot**.
- Created and optimized datapoint driven **dynamic SQL queries** to enhance complex data retrieval for business reports, reducing query execution time by 25%.
- Designed and deployed an **ETL pipeline** in **Python**, streamlining the process of extracting, transforming, and loading data from multiple sources into a centralized **SQL database**, improving data processing efficiency and automating the complete process more than 50%.
- Enhanced **data integration** and reporting processes by troubleshooting and improving existing ETL workflows for Canadian **mutual fund** and **ETF data**, resulting in 100% accurate data inflow in the system.
- Built reusable **UI components** in **React.js** using **Redux**, leading to a more modular front-end and faster development cycles. Integrated **Spring Boot APIs** for seamless data exchange between front-end and back-end.
- Built and **dockerized** Python **microservices** for **ETL** (Extract, Transform, Load) processes, ensuring scalable and efficient **data integration** and processing and build **CI\CD pipeline** using **Gitlab runner** and **Linux server** and used **Redis** for inter-process communication and caching requests.
- Gained hands-on experience with **SSIS** and **SSRS**, contributing to **data integration** and **report generation** tasks.
- **Developed POC** for **OpenSearch** to enable **content search** within large datasets of **PDF documents**, enhancing searchability and data access, while collaborating as part of a **2-member development team**.

TECHNICAL PROJECTS

Invoice Generator: [Link](#) | Django, React, AWS EC2

- Developed an Invoice Generator project to learn deployment of Django- React project over amazon EC2 server. Generated Invoice reports using python's reportlab library.

Stocker - [GitHub Link](#) | Django, Web Scrapping, NSE tool API, LSTM

- Designed and developed a **real-time mock stock market web application** with an integrated **LSTM model** for stock trend predictions, improving user decision-making through actionable insights.
- Led both the **backend** and **frontend development**, while utilizing **Django** for rapid development and using third party APIs for near real time financial data.

Prabandh - [GitHub Link](#) | Django, REST API, Javascript

- Engineered a **web application** to facilitate **peer-to-peer product rentals**, creating a platform that increased seller revenue by providing them incentive of 5-15% over the price of product.
- Defined the project's architecture and developed key **UI and backend components**.

C2C Auction System - [GitHub Link](#) | JAVA, JDBC, MYSQL, JAVA SWING

- Developed an **online auction system** to help users maximize product value based on real-time demand. Integrated **JDBC** and **MySQL**, and made UI Screen using **JAVA SWING**.

CERTIFICATIONS

- **AWS : The Ultimate Guide to Cloud Computing [IaaS]** - Udemy
- **Quantitative Finance with Python**- Udemy.
- **HTML, CSS and JavaScript** for web developers- Coursera.
- Complete **JavaScript, jQuery** and **React** Bootcamp - Hands-On – Udemy
