EDUCATION

Vivekanand Education Society's Institute of Technology

Bachelor of Engineering in Information Technology

Mumbai

June 2019 – May 2023

EXPERIENCE

Software Developer (Analyst Software Developer)

Jul 2023 – Present

Institutional Shareholder Services- (ISS-Stoxx)

Mumbai

- Developed and implemented a UI driven PDF report generation framework using **Python** and **SQL**, automating real-time reporting reducing 80% efforts of the business to generate the real-time data and also have configurable formatting options provided on UI using **React**- redux and REST API's using **Spring Boot**.
- Created and optimized datapoint driven **dynamic SQL** queries to enhance complex data retrieval for business reports, reducing query execution time by 25%.
- Designed and deployed an **ETL** pipeline in Python, streamlining the process of extracting, transforming, and loading data from multiple sources into a centralized SQL database, improving data processing efficiency and automating the complete process more than 50%.
- Enhanced data integration and reporting processes by troubleshooting and improving existing ETL workflows for Canadian mutual fund and ETF data, resulting in 100% accurate data inflow in the system. Implemented **data warehousing** concept (Dimension and facts table) and **ORM** for the same.
- Built reusable UI components in React.js using Redux, leading to a more modular front-end and faster development cycles. Integrated Spring Boot APIs for seamless data exchange between front-end and back-end.
- Built and **dockerized** Python microservices for ETL (Extract, Transform, Load) processes, ensuring scalable and efficient data integration and processing and build **CI\CD** pipeline using Gitlab runner and **Linux** server and used **Redis** for inter-process communication and caching requests.
- Gained hands-on experience with SSIS and SSRS, contributing to data integration and report generation tasks.
- Developed POC for OpenSearch to enable content search within large datasets of PDF documents, enhancing searchability and data access, while collaborating as part of a 2-member development team.

PROJECTS

Invoice Generator | [Link](#) | *Django, React, AWS EC2*

- Developed simple Invoice Generator project to learn deployment of Django- React project over amazon EC2 server. Generated Invoice reports using python's reportlab library

Stocker | [GitHub Link](#) | *Python, Django, Sqlite*

- Designed and developed a real-time mock stock market web application with an integrated LSTM model for stock trend predictions, improving user decision-making through actionable insights.
- Defined the project's architecture, and led both backend and frontend development, while utilizing Django for rapid development and using third party APIs for near real time financial data.

C2C Auction System | [GitHub Link](#) | *JAVA, JDBC, MYSQL, JAVA SWING*

- Developed an online auction system to help users maximize product value based on real-time demand. Integrated JDBC and MySQL, and made UI Screen using JAVA SWING.
- Responsible for developing project flow, database, made and connected interfaces with the database using JDBC.

TECHNICAL SKILLS

- Programming Languages:** Python, SQL, JavaScript, Java, C++.
- Frameworks:** ETL, React.js, Django, Spring Boot, Redux, Pandas, Git, Docker, Jira, Confluence.
- Tools & Technologies:** Gitlab, CI\CD, Docker, AWS EC2, Linux, SSIS, SSRS, Redis, Data Warehousing
- Libraries:** pandas, numpy, reportlab

ACHIEVEMENTS AND CERTIFICATIONS

- Achieved **highest performance rating** in team for two consecutive years.
- AWS:** The Ultimate Guide to Cloud Computing [IaaS] - Udemy
- Quantitative Finance with **Python**- Udemy.
- HTML, CSS and JavaScript for web developers- Coursera.
